The health database consists of a user login, a user menu, and personal medical records. The health database consists of a user login, a user menu, and personal medical records. The user login has a user name and a password. The username is any name. A password is a username's rot13. The user menu has tabs. The tabs are used to access personal medical records, finding care, and articles. The records tab contains information. Information is input by the patient or the hospital. The finding care tab shows nearby specialists. The articles tab contains recent health articles and a search button. Health articles are relevant to users. The search button refines the shown articles.
